Model 8573

Model 8572L

How do you get more for less? Use the Bloomfield Lo-Profile® brewing system. At less than 17" tall, the Lo-Profile is small in stature but big on capacity. Like all Bloomfield products, this proven, efficient brewing system is designed to take advantage of the finest electrical components and has the lowest service cost in the industry for this type of brewer.

Features

- A high level of commonality of parts with other Bloomfield models will significantly reduce the inventory of spare parts required to service many body styles.
- Exclusive design provides easy access to components for quick service.
- Water volume adjustments can be made with ease, no panels to remove or tools required.
- Ready-to-Brew light indicates the proper water temperature to help eliminate the guesswork in brewing.
- Built-in pour over feature provides flexibility.
- Independent front-mounted hot water faucet (except model 8573) allows drawing of hot water without affecting coffee taste or brewing cycle.

- Premium quality thermostat has a full-length stainless steel sensing bulb that recognizes water temperature extremely accurately and cycles less frequently.
- Superior sprayhead design spreads water over the coffee grounds, creating agitation and a floating action that completely saturates the coffee to capture the full, rich essence of every bean.
- Unique water valve with built-in flow control and strainer assures consistent operation at 20-90 p.s.i.
- One-piece drawn stainless steel water tank has a superior design for extended life.
- Three warming stations with porcelain enameled warmer plates position decanters securely and, with no exposed screw heads, will not scratch or scrape decanters.
- High quality easy to clean stainless steel construction.

Accessories

Bloomfield offers a full line of coffee warmers, grinders and glass decanters.
